

Residential Systems

**High Resolution
Video Surveillance
For Your Home**

www.citsurveillance.com

Featuring Mobotix 3 Megapixel Cameras

Fiberglass reinforced weatherproof housing with no moving parts guarantees longevity even with operating temps from -22° to 140°

High resolution combined with wide angle views (360°, 270°, 180°) and dual lenses provide greater coverage with fewer cameras

Integrated Linux computer in each camera that processes the video eliminating the need for licensed video management software

Connect with a single network cable (PoE) saving the cost of power cabling.

Two-way audio, digital pan tilt and zoom, free control center software, ability to record on internal Micro SD cards, some models with PIR sensors for motion detection

Surveillance will design the perfect solution to fit your unique needs for a home and property surveillance system.

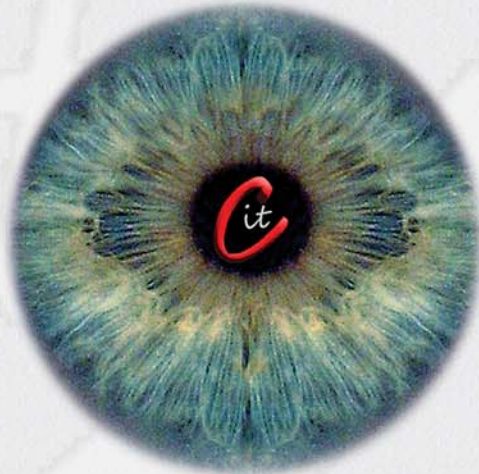

Not to be confused with older CCTV low quality technology, the latest in IP digital systems provide image detail that surpasses high definition TV.

With the expertise of our parent networking company, HELPCo, we can extend your current network with wireless bridges for surveillance from additional guest buildings, warehouses, garages, gatehouses, etc.

Video motion windows can be defined to alert you of activity on the premises. These alerts can trigger audio playback on the camera, emails, recordings, or even VOIP calls.

-  on your laptop, tablet or smart phone
-  in the day & at night with one camera
-  on a standard PC with free software
-  in high definition with fewer cameras
